AXOR®

DOOR LINE DL

DOOR LINE DL

Door Line is a product line of door locks. Like all AXOR products, door locks are characterized by:

- reliability and durability in the operation of all the elements;
- the strength of high-quality materials, of which all the components are made;
- unique protective surface coating that ensures high resistance to corrosion.

Closed, all-steel case of AXOR Door Line DL locks creates a finished aesthetic look of design and ensures all its components protection against ingress of dust and debris into the mechanism.

Door Line DL product range includes:

- multi-point mortise locks;
- short one-point locks
- locks for bathroom doors;
- lock for aluminium doors;
- multi-point door lock;
- locks double sash doors;
- door hinge 3D PVC;
- lock cylinders;
- door handle sets.

rev. 4.01.00
30.10.2026

Easy changing of the door swing direction

Roller latch in the door lock accounts for direction of door's opening. Door lock of AXOR was made in such way that direction of door's opening can be changed. Detailed instructions for changing the opening direction are described on page 5.

Door casing extension

AXOR Door Line DL product range includes locks with a possibility of casing «extension» along the sash perimeter allowing you to install additional locking elements, which will ensure tight pressing of the door leaf against the frame and improve general structural integrity.

The possibility of using push handle sets with 3 screw holes

The design of AXOR Door Line DL locks allows you to use push handle sets with three fixing points (European standard) that allows you to securely fix the set on the door, thus ensuring longer service life.

Individual branding

AXOR Door Line DL locks have a special seat for branding by installation of a metal plate with your logo into the lock strike plate. The logo on the lock is a durable and non-standard advertising that adds distinctiveness to the product and successfully promotes your brand.

Security pins

AXOR Door Line DL locks may be fitted with mushroom pins in order to improve the lock's anti-burglar properties.

Deadbolt in AXOR Door Line DL locks

Key-operated mortise lock has a steel deadbolt. Handle-operated mortise lock and short mortise lock with a dornmass of 35 mm are fitted with a deadbolt with steel pins, thus making a door more resistant to break-in.
